Full of bugs(Im 15 level cant get through Archon Liriel Ambition quest because its bugged),more reading and finding walkthroughs than playing/building/killing... and previous versions of SF2 I won like 5 times.... Stupid game. Really well done turn-based, grid-based voxel rpg. You're a warlock and can cast spells and summon and control monsters.. Fairly unique platformer. You are a naked green alien with red hair and suction cups for hands. Besides the basic jumping on enemies attack, you get bombs a both a weapon and utility to get through the level. The suction cup hands allow the player to scale up walls which is absolutely necessary for some levels. I grew up with the first game, but finally get to play the other two.. Rest in peace man.... :( You made an amazing game.. Pretty good strategy game about resources management where youre goal is to defend yourself against spiders and make youre soldiers infiltrate their nest in one piece.

I really liked how the spiders attack the power supply to cut youre lights out and how they just jump on youre face to damage you, it was spooky.

I heard about the crash problems some people experienced but for me it wasn't that bad, I only got one in 110 minutes. I wish the game would have more content but it's really fine considering it's price (got it on sale) and it's infinite mode.

. Rosebud Condominium may seem like yet another casual video game, but hidden behind this facade hides a critical videogame that imparts an important life lesson. The heroine, Sarah, is indeed aspiring to stratospheric heights. Joining her are two mysterious men; her "boss" who has mandated to her the impossible task of creating the tallest condominium that the world has yet to see, and Craig, whose various schemes are a constant threat to the completion of her out of this world project. Rosebud Condominium is a masterpiece in that it is able to present the concept of futility under the guise of a lighthearted video game. But of course, only the most intelligent can see through this facade. As such, it is able to provide both a meaningful life message and a worthwhile amount of gameplay. If you have the time and money to play a video game, then I suggest that you get Rosebud Condominium to experience how a seemingly mundane video game can serve as a medium to impart important life lessons.

This is what I dislike about this game

Other than that 2.74 CAD is an okay price for this kind of visual novel. The game was going good. I liked the minimalist colorful graphics. But then the language showed up. Even though the T rating didn't include "language" in it, there was the notorious "S-word" in the game. The hero was already talking too much and to add insult to her dumb dialogue, she had to resort to swearing like this. I stopped playing after this point. It really made me very angry that such language had to be dumped in the game like this. Kit kat being this cute little robot saying "damn" also seemed totally unnecessary and just more dumb dialogue. The kit kat character along with the cute creatures in the game, colorful cartoony graphics, lack of blood and gore, also made it seem as if this was an E rated game. But seems like I was wrong. I don't care what anyone says, this is a big pet peeve of mine and I won't let it happen ever again. I played the Metroid games and there wasn't this ridiculous language, and Metroid is rated T. Besides the language, some of the dialogue is dumb anyway and I think the characters talk too much, which leads to stupid language. I also ran into a few minor bugs in the game. I also thought the game was too easy, and it got a little repetitive at times. I'll stick with Metroid.. I bought this for my 6 year old daughter. She likes it and once you help your kids get the hang of the game it can be lots of fun for them. She particularly likes interacting and conversing with other ponies, so being able to read helps. There are a few minor bugs with regard to menu sizing but for \$5 I can't really complain about a Pony Sims game.. The majority of the content in this DLC is a nice addition. However, I'm giving it a thumbs down because I paid full price for it and completely regretted it seconds after trying out the drag race portion of it. The ridiculously slow loading times between each drag race, not to mention the lack of proper throttle control is just unforgivable. I mean, 60+ seconds of loading time on an SSD for each and every single time you want to retry a drag race because you screwed up on the initial start due to lack of proper throttle control... horrible.

Oh, and if that wasn't bad enough, ECU/Carb tuning offers no profit increase whatsoever, and doesn't appear to be implemented for customer car repairs either. So what was the point of it other than showing off in a poorly implemented drag race?. Short but awesome!!!

this game trolls you left and right and it's a riot!!! I love games like the Talos Principle and this fits right in as a "look" at those style of games themselves. It's meta as all get out, and that's too trendy now to call cool, but they pull it off stupendously. the voice work is hilarious.

Con: it's really short. I know this type of thing takes forever to put together, and I'm ok with it. just feels a bit pricey for a game i've spent 5.6 hrs on, granted I could save a baby for 4 hrs still, but I really don't see myself replaying this much more. I don't feel swindled, just overcharged. 4.99 - 9.99 I feel is a better cost v. reward ratio.
